Web Fundamentals

Project: Phishing

1. Cloning website and using domain

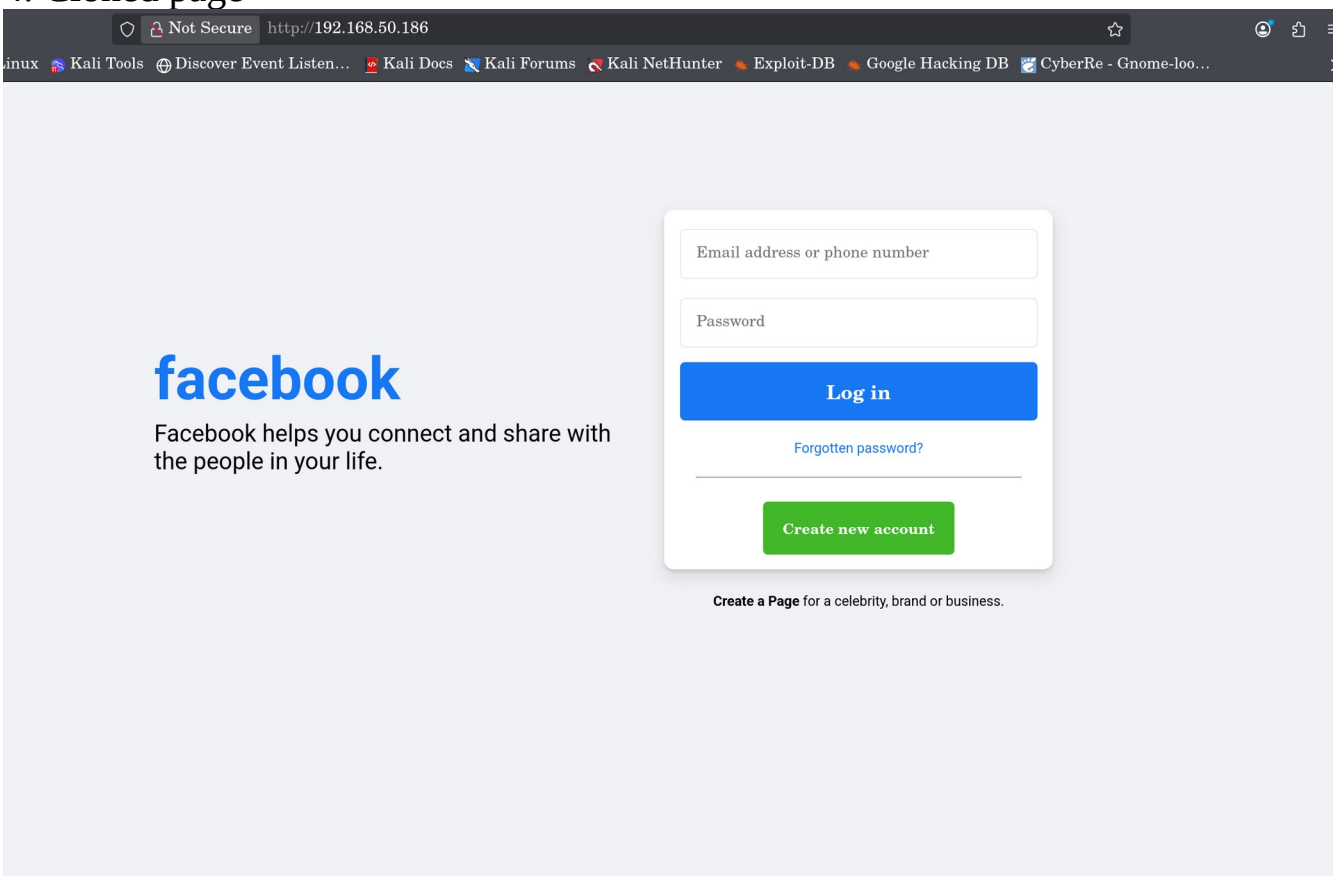

2. Cloned page (the cloned site login page is mine)

3. Using template without domain

4. Cloned page

5. Credential gathering

```
┌──(evgeni㉿kali)-[~/ThinkCyber/Project/xe107/Scripts]
└─$ sudo cat /var/www/data/luxurystays.bg.json

  {
